FOR IMMEDIATE RELEASE

Colorado's Sky Peak Technologies Wins Best Value-Added Service Award at MVNO Nation 2024

Grand Junction, Colorado – Sky Peak Technologies, a trailblazer in telecommunications innovation, is thrilled to announce its recognition as the recipient of the Best Value-Added Service Award at the MVNO Nation's Global Awards event in Valencia, Spain. This distinguished award highlights Sky Peak's patented breakthrough solution, CORASM Mobile Edge (ME), an on-device, smart content-shaping technology that empowers Mobile Virtual Network Operators (MVNOs) to manage soaring mobile streaming traffic affordably and effectively.

The Best Value-Added Service Award celebrates providers who deliver transformative, customer-centric solutions that enhance MVNO services. Sky Peak Technologies was acknowledged for its proprietary CORA ME technology, which dynamically optimizes data delivery by managing over-the-top (OTT) video content directly on mobile devices. CORA ME provides a cost-effective, agile alternative to traditional network management tools, enabling MVNOs to address the relentless growth in streaming demands.

"We are incredibly honored to accept the Best Value-Added Service Award," said Cat McIntosh, CEO of Sky Peak Technologies. "This recognition reflects the dedication and hard work of our small yet passionate team, who have invested years in R&D, marketing, and execution to push the boundaries of mobile data management. We're also deeply grateful for the ongoing support from our investors, who believe in our vision to redefine data efficiency for MVNOs, and to Colorado's Office of Economic Development and International Trade (OEDIT) who helped us attend this international trade event through their grant programs."

CORA ME was celebrated at MVNO Nation for its ability to significantly reduce data usage for video streaming, enhancing MVNO profitability and boosting subscriber satisfaction. By enabling MVNOs to efficiently and inexpensively manage data demands, CORA ME ensures a smoother, more cost-effective solution to video streaming for customers worldwide.

About MVNO Nation

MVNO Nation is a leading global telecommunications event held from November 6-8, 2024, in Valencia, Spain. The conference gathers top leaders and innovators from around the world to network, share insights, and celebrate advancements shaping the future of the industry.

About Sky Peak Technologies: At Sky Peak Technologies, we believe everyone everywhere should have access to data-intensive content regardless of where they live, their economic status, or other circumstances. That is *why* we develop and distribute bold and novel technologies that enable all people to share ideas and knowledge, making our world more culturally connected and educated while protecting the remarkable resources of our planet.
